WORK EXPERIENCE

Intelliversal Integrated Solutions

Jan. 2024 – Present

Software Engineer

Karachi, Sindh

- A Silver Partner of Odoo, Intelliversal Integrated Solutions specializes in enterprise software integrations and custom Odoo implementations across diverse industries.
- **Tech Stack:** JavaScript (OWL); Python (Odoo); XML/QWeb; Linux (Ubuntu|Mint-XFCE); PostgreSQL
 - Led the design, development, and documentation of custom **APIs** for Sales, Purchase, PoS and E-Commerce clients, streamlining integrations and improving maintainability.
 - Delivered a full-featured Employee Portal with geofencing, attendance tracking, leave/loan management, and payslip access for **~350 employees**.
 - Eliminated the need for internal Odoo employee user licenses, resulting in **~\$5,000 in direct cost savings** and improved HR self-service.
 - Developed cleanup scripts that identified and removed unused files, reducing occupied storage by **over 70%**, which improved server performance and reliability.
 - Built flexible **Dashboards** using Chart.js to visualize key metrics across operations, enabling data-driven insights across departments.
 - Contributed to client projects across industries including real estate, logistics, agriculture, electronics, pharmaceuticals, and international e-commerce.

Al-Idrak Al-Taqni Li-Taqniyat Al-Ma'lumat (SAVY)

May. 2024 – Nov. 2024

Software Engineer | Consultant

Riyadh, Riyadh Province (Remote)

- A tech solutions provider specializing in developing localized software products for the Saudi market, including a custom-built Point of Sale (PoS) system tailored for regulatory and business needs in the region.
- **Tech Stack:** JavaScript (OWL); Python (Odoo); XML/QWeb; Linux (Ubuntu|Mint-XFCE); PostgreSQL
 - As a full-time outsourced Software Engineer on a 6-month contract, contributed towards the end-to-end development of a **SaaS-based PoS** product specifically designed for businesses in Saudi Arabia.
 - Built the system from the ground up, focusing on scalability, modularity, and cloud deployment.
 - Implemented reporting features including compliance with **ZATCA** (Zakat, Tax and Customs Authority) regulations.
 - Integrated Arabic language support for receipts and printing to meet local requirements.
 - Designed a flexible role-based access control system, allowing for **100% customization** of user permissions per business needs.
